THE PREMIUM CABINET COLLECTION

QUALITY MATERIALS

At Samuel Müeller, every cabinet is crafted from carefully chosen materials that ensure longevity, strength, and timeless beauty in your kitchen. We believe that the foundation of exceptional cabinetry lies in quality components that stand the test of time and daily use.

Exceptional Durability

Our cabinets are constructed from high-quality plywood, known for its exceptional durability and resistance to warping. Unlike particleboard, which can degrade over time, plywood provides a solid, lasting foundation that holds up beautifully to the demands of a busy kitchen.

Enhanced Stability

Our cabinets start with a sturdy ½" Plywood Box for added strength and stability. The 5-piece doors and drawer fronts are constructed with either a 3" (Shaker) or ¾" (Slim Shaker) solid birch frames. Each drawer is crafted with dovetail joints that enhances both durability and aesthetics. Shelves are constructed with ¾" plywood with front edge banding

Easy Maintenance

All interiors are UV-coated, creating a protective layer that preserves the natural beauty of the wood while making surfaces easy to clean. This thoughtful touch keeps your cabinets looking fresh, even after years of use, with minimal maintenance required.

Lasting Beauty and Refinement
