INSTALLATION NOTES

This product is to be installed according to the installation guide.

Drain cutout in subfloor to be 4-1/2" diameter and located per the rough-in Illustration 1. Dry fit the shower base to ensure a proper fit and correct alignment of the shower drain and the hole in the floor.

Unit can be installed with aluminum hanging rail provided. Alternate adhesive method of installation can be used without the use of the hanging rail (see full instructions for details). Position of hanging rail mounting is also critical. See Illustration 2 for horizontal positioning of hanging rail. The top of the hanging rail to be positioned at 76" above finished floor when using a 3" high Transolid® shower base. When you do not use a Transolid® shower base the upper hanging rail should be installed 73" above the finished threshold.
