

FEATURES

- Pre-assembled kits for waterproofing showers constructed with curbless wet room shower bases
- Sufficient waterproofing materials necessary for installation of a curbless wet room shower base only, including waterproofing of the shower base, as well as ancillary materials required for proper installation of the base and application of the waterproofing system
- Intended for installations where the installer will use an alternate waterproofing system for the walls and surrounding floor, typically an uncoupling underlayment
- Tank/10 waterproofing compound is used to overlap other wall and/or surrounding floor waterproofing

- Note: additional waterproofing supplies may be needed depending on project requirements

KIT INCLUDES:

- (1) 0.5 gallon pail of TANK/10 waterproofing compound (covers approx. 30 sq. ft. with two coats)
- (1) 75 ft. roll of joint reinforcement tape
- (2) internal corners
- (2) external corners
- (32) #9 x 2.5-in premium Torx screws
- (1) Torx bit driver
- (6) 10 oz. tubes of multi-purpose hybrid sealant
- (12) pairs of nitrile gloves
- (1) paint roller handle
- (2) paint roller covers
- (1) paint brush
